By Frank M. Carrano : Data Structures and Abstractions with Java (3rd Edition) acknowledgments i am grateful to nima hoda who spent a summer tirelessly proofreading many of the chapters in this book; to the students in the fall 2011 2 csie ntut taiwan 4 applied computing lab text books ellis horowitz sartaj sahni and susan anderson frees fundamentals of data structures in c 2nd edition Data Structures and Abstractions with Java (3rd Edition):

2 of 2 review helpful content is good but By anonymousReviewer First off i want to say this book isn't all bad i ended up getting a print edition and though i hate carrying it to class the information is pretty solid I really like the material covered i think the author does a good job of balancing explanation with code examples though i wish each example

was printed together rather than a skeleton of a class Data Structures and Abstractions with Java 3e is ideal for one or two semester courses in data structures CS 2 in the departments of Computer Science Computer Engineering Business and Management Information Systems This is the most student friendly data structures text available that introduces ADTs in individual brief chapters — each with pedagogical tools to help students master each concept quickly. Using the latest features of Java 8 About the Author Frank M Carrano is a professor emeritus of computer science at the University of Rhode Island He received the Ph D degree in computer science from Syracuse University in 1969 His interests include data structures computer science edu
