emergence the formation of global patterns from solely local interactions is Intelligence Emerging: Adaptivity and  
Search in Evolving Neural Systems (MIT Press):

Emergence the formation of global patterns from solely local interactions is a frequent and fascinating theme in the scientific literature both popular and academic In this book Keith Downing undertakes a systematic investigation of the widespread if often vague claim that intelligence is an emergent phenomenon Downing focuses on neural networks both natural and artificial and how their adaptability in three time frames phylogenetic evolutionary ont In this deep and broad book Downing takes up the challenge of explaining how intelligence emerges in the evolutionary developmental and learning senses Drawing together evidence from neuroscience computational neuroscience classical AI and connectioni
