**By Cornelis Roos, Tamás Terlaky, J.-Ph. Vial : Interior Point Methods for Linear Optimization** most numerical optimization routines require that the user provides an initial guess for the solution i have previously described a

method for choosing an initial this book provides a unified insightful and modern treatment of linear optimization that is linear programming network flow problems and discrete optimization Interior Point Methods for Linear Optimization:

The era of interior point methods IPMs was initiated by N Karmarkar's 1984 paper which triggered turbulent research and reshaped almost all areas of optimization theory and computational practice This book offers comprehensive coverage of IPMs It details the main results of more than a decade of IPM research Numerous exercises are provided to aid in understanding the material From the reviews of the second edition The second edition of this successful book on interior point methods for linear optimization appears eight years after the first one It presents a unified framework for these algorithms and it is a comprehensive tr
