By Serguei A. Stepanov : **Codes on Algebraic Curves** coding theory sometimes called algebraic coding theory deals with the design of error correcting codes for the reliable transmission of information across noisy the online version of finite fields and their applications at sciencedirect the worlds leading platform for high quality peer

reviewed full text journals Codes on Algebraic Curves:

This is a self contained introduction to algebraic curves over finite fields and geometric Goppa codes There are four main divisions in the book The first is a brief exposition of basic concepts and facts of the theory of error correcting codes Part I The second is a complete presentation of the theory of algebraic curves especially the curves defined over finite fields Part II The third is a detailed description of the theory of classical modular curves and the
