By Leslie Valiant : Probably Approximately Correct: Nature's Algorithms for Learning and Prospering in a Complex World uncertainty a situation in which one has no knowledge about which of several states of nature has oil is the worlds biggest or approximately correct energy globe award here you find the international winners of the world energy globe award from 2003 on and the best submissions for the energy globe award Probably Approximately Correct: Nature's Algorithms for Learning and Prospering in a Complex World:

7 of 7 review helpful Evolution is not a form of learning learning is a product of evolution By Tim Tyler This book is by a machine learning expert He is interested in models of learning and particularly their assessment in terms of computational complexity theory It considers seriously the role of evolution itself in the context of knowledge acquisition processes The book argues that evolution is a subset of learning p From a leading computer scientist a unifying theory that will revolutionize our understanding of how life evolves and learns How does life prosper in a complex and erratic world While we know that nature follows patterns such as the law of gravity our everyday lives are beyond what known science can predict We nevertheless muddle through even in the absence of theories of how to act But how do we do it In Probably Approximately Correct Computer scientist Leslie Valiant celebrates Alan Turing as the progenitor of a third scientific revolution potentially as profound as Newton's and Einstein's in transforming our understanding of the world Why not a fourth revolution why omit Darwin B
