**By Timothy Masters : Neural, Novel & Hybrid Algorithms for Time Series Prediction** general purpose computing on graphics processing units gpgpu rarely gpgp or gpu citation needed is the use of a graphics processing unit gpu which typically amity school of engineering and technology offers btech in different streams Neural, Novel & Hybrid Algorithms for Time Series Prediction:

8 of 8 review helpful Not for beginners By Dr Lee D Carlson Prediction methods for time series are a multi million dollar industry and are of upmost importance in financial engineering weather prediction logistics network modeling and myriads of other fields This book gives an overview of various methodologies for time series prediction and is written for readers with substantial experience in this area The author An authoritative guide to predicting the future

using neural novel and hybrid algorithms Expert Timothy Masters provides you with carefully paced step by step advice and guidance plus the proven tools and techniques you need to develop successful applications for business forecasting stock market prediction engineering process control economic cycle tracking marketing analysis and more Neural Novel Hybrid Algorithms for Time Series Prediction pro From the Publisher Covering both the practical application of traditional prediction methods and Master s own innovative techniques featuring neural and fuzzy algorithms this outstanding guide provides concepts approaches and implementation plus software and
