By Benjamin M. Bolker : Ecological Models and Data in R evaluation guidelines for ecological toxicity data in the open literature may 9 2011 procedures for screening reviewing and population viability analysis pva is a species specific method of risk assessment frequently used in conservation biology it is traditionally defined as the Ecological Models and Data in R:

0 of 0 review helpful A terrific book on ecological modelling in R By Dr Joseph A Bulbulia This is an excellent resource for anyone who wants to learn how to model GLMMs in R complete with R code graphs worked examples simulation methods lots else It is certainly a good introductory text and doesn t assume too much by way of mathematical statistical background However there s no shallow end to this book I suspe Ecological Models and Data in R is the first truly practical introduction to modern statistical methods for ecology In step by step detail the book teaches ecology graduate students and researchers everything they need to know in order to use maximum likelihood information theoretic and Bayesian techniques to analyze their own data using the programming language R Drawing on extensive experience teaching these techniques to graduate students in ecolog Bolker s book is a must buy for anyone wanting to fit data to models and go beyond hypothesis testing but it is certainly not an introductory text in the sense of simple This book is a tour de force for anyone who studied ecology for his or her interest
