| #5103644 in Books | CRC Press | 1996-05-15 | Original language: English | PDF # 1 | .95 x 6.42 x 9.56l, 1.42 | File type: PDF | 336 pages
| | File size: 41.Mb

By Sankar K. Pal, Paul P. Wang : Genetic Algorithms for Pattern Recognition face recognition homepage relevant information in the the area of face recognition information pool for the face recognition community entry

point for novices as forthcoming event research the major areas of on going research in the unit include optical character recognition natural language processing pattern recognition Genetic Algorithms for Pattern Recognition:

Solving pattern recognition problems involves an enormous amount of computational effort By applying genetic algorithms a computational method based on the way chromosomes in DNA recombine these problems are more efficiently and more accurately solved Genetic Algorithms for Pattern Recognition covers a broad range of applications in science and technology describing the integration of genetic algorithms in pattern recognition and machine learning problems to build
