32 of 32 review helpful Deservedly a classic By Tom Morrisette This is a superb book I taught a graduate level course based on it at Lehigh University in 1984 or 1985 It was awarded the prestigious annual Lanchester prize for book of the year Operations Research Society of America about that time Robert Tarjan was awarded the ACM s Turing award computer sciences closest equivalent to the Nobel Prize for his contib There has been an explosive growth in the field of combinatorial algorithms These algorithms depend not only on results in combinatorics and especially in graph theory but also on the development of new data structures and new techniques for analyzing algorithms Four classical problems in network optimization are covered in detail including a development of the data structures they use and an analysis of their running time Data Structures and Network Algorithms att
