By Alexander Shen : Algorithms and Programming: Problems and Solutions (Modern Birkhäuser Classics)

Algorithms and Programming: Problems and Solutions (Modern Birkhäuser Classics):

This book is primarily intended for a first year undergraduate course in programming. It is structured in a problem solution format that requires the student to think through the programming process thus developing an understanding of the underlying theory. Each chapter is more or less independent. Although the author assumes some moderate familiarity with programming constructs, the book is easily readable by a student taking a basic introductory course in computer.
