By Flavio Junqueira, Benjamin Reed : ZooKeeper: Distributed Process Coordination official site of the apache project to provide an open source implementation of frameworks for reliable scalable distributed computing and data storage apache kafka workflow learn apache kafka starting from the introduction fundamentals cluster architecture workflow installation steps ZooKeeper: Distributed Process Coordination:

5 of 5 review helpful A Reference that's been needed for a long time By Anthony C Sheller A book on ZooKeeper has been needed for a long time The author walks one through setting up and using Zookeeper this can be contrasted with

the small ZooKeeper section in the Hadoop book This book is much more thorough and in depth coverage of the topic While I'm still working through the examples and learning I can say that it Building distributed applications is difficult enough without having to coordinate the actions that make them work This practical guide shows how Apache ZooKeeper helps you manage distributed systems so you can focus mainly on application logic Even with ZooKeeper implementing coordination tasks is not trivial but this book provides good practices to give you a head start and points out caveats that developers and administrators alike need to watch for About the Author Flavio Junqueira is a member of the research staff of Microsoft Research in Cambridge UK He holds a PhD degree in Computer Science from the University of California San Diego He is interested in various aspects of distributed systems
