By Kevin Tatroe, Peter MacIntyre, Rasmus Lerdorf : Programming PHP: Creating Dynamic Web Pages computer programming tutorials and source code for beginners who wish to start programming tutorials mainly for the net framework but also for other languages free courses and tutorials for web development and programmers php mysql javascript jquery ajax html css and flash actionscript 3 Programming PHP: Creating Dynamic Web Pages:

12 of 12 review helpful More of a reference than an introduction By Neil I wouldn t recommend this book to people with no scripting programming experience as it dives right in It feels more like a reference book The subject matter is more about the language itself rather than using examples on how to use php It s a decent book for someone who

knows how to program and needs a reference on PHP but if I was a complete novi This updated edition teaches everything you need to know to create effective web applications with the latest features in PHP 5 x You rsquo ll start with the big picture and then dive into language syntax programming techniques and other details using examples that illustrate both correct usage and common idioms If you have a working knowledge of HTML the authors rsquo many style tips and practical programming advice will help you become a top notch
