By Anthony Sofo : Computational Techniques for the Summation of Series course descriptions courses offered in our department for applied and computational mathematics control and dynamical systems and computer science are listed below adf is the amsterdam density functional program system for high quality computational chemistry research the two main programs are Computational Techniques for the Summation of Series:

This book collects in one volume the author rsquo s considerable results in the area of the summation of series and their representation in closed form and details the techniques by which they have been obtained the calculations are given in plenty of detail and closely related work which has appeared in a variety of places is conveniently collected together The Australian Mathematical Society Gazette From the reviews This book collects in one volume the author rsquo s considerable results in the area of the summation of series and their representation in closed form and details the techniques by which they have been obtained hellip the calculations
