In the second edition of this practical book four Cloudera data scientists present a set of self contained patterns for

performing large scale data analysis with Spark. The authors bring Spark statistical methods and real world data sets together to teach you how to approach analytics problems by example. Updated for Spark 2.1, this edition acts as an introduction to these techniques and other best practices in Spark programming. You'll start with About the Author, Sandy Ryza, develops algorithms for public transit at Remix. Prior he was a senior data scientist at Cloudera and Clover Health. He is an Apache Spark committer, Apache Hadoop PMC member and founder of the Time Series for Spark project H.
