**By Bradley Green : Programming Problems: A Primer for the Technical Interview (Volume 1)** big data is a term for data sets that are so large or complex that traditional data processing application software is inadequate to deal with them today is bastille day in france and president trump is there to celebrate it but why and what exactly is

the holiday all about Programming Problems: A Primer for the Technical Interview (Volume 1):

16 of 17 review helpful Extremely frustrating book still somehow useful By U V Actually I am not sure if it should be called a book It looks like a collection of informal notes collected by an engineer who is pretty good at algorithms It is still a good although not complete overview of basic algorithms for a technical interview However it comes at a high cost I didn't look for a book with all the formal A complete primer for the technical programming interview This book reviews the fundamentals of computer programming through programming problems posed to candidates at Amazon Apple Facebook Google Microsoft and others Complete solutions to every programming problem is provided in clear explanations and easy to read C 11 code If you are learning to code then this book provides a great introduction to C 11 and fundamental data structures and algorithms If y
