Design Optimization is an exciting field The increasing power of desktop computers are opening up applications in design optimization that heretofore were difficult to solve or optimize As a registered professional engineer I feel comfortable stamping designs derived via evolutionary computation since they Some of the most startling achievements in the use of computers to automate design are being accomplished by the use of evolutionary search algorithms to evolve designs Evolutionary Design By Computers provides a showcase of the best and most original work of the leading international experts in Evolutionary Computation Engineering Design Computer Art and Artificial Life By bringing together the highest achievers in these fields for the first time in com Evolutionary Design by Computers is a collection of essays that describe recent research into evolutionary computing where computers mimic the strategies of biological evolution to solve problems in architecture engineering art and artificial
