By Joseph-Frédéric Bonnans, Jean Charles Gilbert, Claude Lemarechal, Claudia A. Sagastizábal : Numerical Optimization: Theoretical and Practical Aspects (Universitext) nonlinear programming nlp list of the new elected

members to the european academy of sciences Numerical Optimization: Theoretical and Practical Aspects (Universitext):

This book starts with illustrations of the ubiquitous character of optimization and describes numerical algorithms in a tutorial way It covers fundamental algorithms as well as more specialized and advanced topics for unconstrained and constrained problems This new edition of Numerical Optimization contains computational exercises in the form of case studies which help understanding optimization methods beyond their theoretical description when coming to actual imp From the reviews of the second edition This volume is a collection of four coordinated monographs on topics in numerical optimization hellip the four sections of the book fit together to provide a broad survey of methods for numerical optimization at
