By Gregory. J. Chaitin : Algorithmic Information Theory (Cambridge Tracts in Theoretical Computer Science)
constructive mathematics is positively characterized by the requirement that proof be algorithmic loosely speaking this means that when a mathematical object is various number theorists home pagesdepartmental listings complete listing a b c d e f g q q a href=""listhtmlhquot;gt;h i j k l m Algorithmic Information Theory (Cambridge Tracts in Theoretical Computer Science):

0 of 6 review helpful Good book to start learning about LISP and Artificial Intelligence By Hex1a4 Pretty much what I said in the title If you re a student wanting to learn about LISP and or Artificial Intelligence this book is a good

explanation of the fundamentals Chaitin the inventor of algorithmic information theory presents in this book the strongest possible version of Gödel's incompleteness theorem using an information theoretic approach based on the size of computer programs One half of the book is concerned with studying the halting probability of a universal computer if its program is chosen by tossing a coin The other half is concerned with encoding the halting probability as an algebraic equation in integers a
